Contact page					x
Reflections (description of portfolio pieces)					
Content of reflections appropriate				x	
Project images are high quality					x
Spelling and grammar are correct				x	

What was your overall first impression of the website?

The font and layout seemed very large to me, with a sepia color scheme that reminded me of a faded paper, or an eye-friendly render.

There is little information on the main page, but many clickable elements full of more info.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

The download resume button does not work, Zooming the webpage in and out disrupts the padding and spacing of the elements. There is some load time when drawing images for the first time, so some elements pop into existence after a few hundred milliseconds.

What do you feel are the most effective design elements of this web portfolio?

I liked the about, contact us, and case study pages the most. Those had the most engaging layout for me and played to the strengths of the calming theme.

What would you suggest be changed with the design or content of this web portfolio?

More information on the main page. Highlight the best parts of the resume like the case study, and about page, while pressing the more generic webpages into a more compact medium such as a carousel. Show that you have a large quantity of experience in a short amount of time, without providing the audience the ability to nit-pick personal projects, so that they can remain focused on skillset.
